

Atmospheric Chemistry and Air Pollution Yesterday, Today, and Tomorrow ~ In Honor of Dr. James N. Pitts, Jr. ~

Monday, August 13, 2001
University of California, Irvine
Crystal Cove Auditorium, 8:30 a.m. – 5:00 p.m.

A Memorable Day Celebrating the Contributions of a Founding Atmospheric Chemist

James N. Pitts, Jr. has had and continues to have a **profound impact** on the understanding of atmospheric chemistry.

As author of **several books** and more than **375 scientific articles**, he has made innumerable contributions directly to the field. Indirectly, his influence is even more extensive: over the years, he has **mentored** and **assisted** in the development of so many students who are now making their own contributions.

And, as Professor Emeritus here at UCI, he continues to guide and educate the next generation of atmospheric chemists, as well as influence **environmental policy** at the state level. Anyone learning atmospheric chemistry must start by exploring the works of Jim Pitts.

This symposium will include several prominent speakers and a poster session.

The speakers include :

Ralph Cicerone (Chancellor, UC Irvine),

Hajime Akimoto (Institute for Global Change Research)

Janet Arey (SAPRC, UC Riverside)

Roger Atkinson (SAPRC, UC Riverside)

Jeff Gaffney (Argonne National Laboratory)

Ernesto Tuazon (SAPRC, UC Riverside)

Arthur Winer (UC Los Angeles)

Sherwood Rowland (UC Irvine)
