

Empowering muscle, empowering lives. Cytokinetics is a late-stage biopharmaceutical company focused on discovering, developing and commercializing first-in-class medicines that target impaired muscle function. Our mission is to bring forward new medicines to improve the health span of people with devastating cardiovascular and neuromuscular diseases.

2026 Cytokinetics Information Session & Recruiting

Date:

Friday July 24th 2026

Information Session

9:00AM – 10:00AM; followed by individual interviews

- Light breakfast will be served

Please register for the information session by Tuesday July 21st.

At Cytokinetics, we are committed to robust scientific thinking, grounded in integrity and critical thinking, and not polluted by divisiveness. We invite healthy debate, test hypotheses, encourage independent thought and explore courageously the unknown. We are problem solvers—we push boundaries and think beyond the norm to come up with out-of-the-box solutions that make a difference for our patients.

Discovery Research Open Positions:

Cytokinetics is looking for talented chemistry Ph.D students and postdocs that are interested in pursuing a career in medicinal chemistry. Extensive knowledge in synthetic organic chemistry is required. Applicants must possess strong verbal and written communication skills and be able to work collaboratively in team settings. A strong track record of experience and accomplishment in total synthesis, methodology/catalysis, and/or medicinal chemistry is highly desired.

Positions located in South San Francisco.

Please join the informational session to learn more about the chemistry-related positions.
