
The congress will take place in Honolulu, Hawaii, USA, December 15 - 20, 2010.

Environmental Chemistry of Aerosols (#237)

Symposium abstract. Atmospheric aerosol particles affect many environmental issues including health effects, air quality and pollution, visibility, climate forcing at regional and global scales. Understanding the environmental impact of aerosols relies on the fundamental knowledge of the relationship between their molecular composition and their chemical and physical properties. This symposium will cover recent advances in the cross-disciplinary areas of physical, analytical and environmental chemistry of aerosols focused on the following topics: 1) Chemical Composition and Physicochemical Properties of Aerosols, 2) Heterogeneous chemistry of aerosols and cloud droplets, 3) Frontiers in Aerosol Analytical Chemistry and Spectroscopy.

The abstract submission window is open from January 1 and closes on April 5. You can submit your abstract using the following link: http://www.pacifichem.org/abstracts

Organizers:
Alexander Laskin, Pacific Northwest National Laboratory, USA
Sergey Nizkorodov, University of California, Irvine, USA
Allan Bertram, University of British Columbia, Canada
Ruth Signorell, University of British Columbia, Canada
Chak Chan, Hong Kong University of Science and Technology, China
Xin Yang, Fudan University, China
